The Spirit of Innovation

COLOP®
MARKING SOLUTIONS

About us

The Spirit of Innovation

Global Player. COLOP is one of the world's leading manufacturers of modern stamp and marking devices. With more than 500 employees and numerous subsidiaries worldwide. COLOP exports to 120 regular markets with an export rate of more than 98 %. Continuous growth is firmly rooted in COLOP's corporate philosophy, which ensures that the globally increasing demand for high-quality European stamp products can continue to be met in the future. It was for this reason that a major expansion of the production capacity was carried out in the last few years at both the parent plant in Wels, Austria, and at the company's second production site in the Czech Republic. COLOP today operates in three business areas: in the standard stamps segment, in the digital marking area as well as in the field of arts and crafts.

Innovation & Design. Since it was founded almost 40 years ago, COLOP has been committed to product innovation in the field of state-of-the-art marking devices, particularly stamps. In 2008, for instance, the company introduced 'Green Stamps' into the stamp world. These stamps are made predominantly from recycled or renewable raw materials. Stamps with antibacterial protection are another of the company's significant innovations. With the Printer stamp line, the personalisation of stamps has become a trend. In 2019 COLOP introduced the world's first electronic-digital stamp and marking device for mobile printing of its kind – the COLOP e-mark®.

Marking Solutions. The range of products comprises a large selection of stamp solutions for different applications, including office and pocket stamps, text and date stamps, rectangular and round stamps. COLOP also supplies all the products and systems necessary to ensure a high-quality stamp imprint. The range of services offered by COLOP is rounded off by e-business solutions for the creation of text plates and the sale of stamp products online, as well as software tools for the personalisation of ImageCards™.

Quality & environmental management. COLOP's environmental management system has been ISO 14001 certified for many years, which ensures that all processes have been optimised from an ecological perspective. The company has however also had the conviction to make a voluntary, above-average contribution to environmental issues, going above and beyond the strict EU and national regulations. COLOP has been ISO 9001 certified since 2001. This certification forms the basis for a continual improvement process as part of the company's excellent internal quality management system.

High tech production. A modern and efficient production process is of great importance to COLOP, paying special attention to the energy resources required. Fully automated production and manufacturing of key product lines, ongoing modernisation and upgrading of machinery and constant process optimisations all ensure high quality products and an energy-efficient manufacturing process.

EOS Line

Especially for you

The EOS Line is a modern and ergonomically designed flash stamp for brilliant and sharp imprints. Quick to manufacture and available „while you wait" if required. The attractive black and white handles offer the perfect picture frame for your personal design.
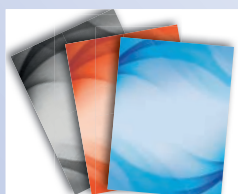

Included are three appealing ImageCard™ designs to choose from

Cover for protection and transportation

X-Large formats for oversize stamping

121 mm

Easy and clean re-inking

Black EOS Standard and XL stamps are made of minimum 80% recycled plastics

EOS ImageCard™ Designer
With the COLOP software you can easily personalise the look of your EOS stamp.

MOTIVATIONAL STAMP

EOS Motivational Stamps

Motivate with an attractive stamp imprint

High quality stamps with positive, motivating messages - designed for target groups such as education or loyalty programs.

Preinked – Stamp is ready to use and requires no extra ink pad

Re-inkable – If imprint fades - pull off the handle and re-ink the stamp for further imprints

Round image sticker – Shows the imprint on the handle and helps to choose the right stamp

High quality inks – for brilliant and jolly imprints

Easy handling – A simple but ergonomical handle guarantees effortless stamping

Practical storage – The enclosed plastic box is perfect to keep the stamp ready and clean when not used
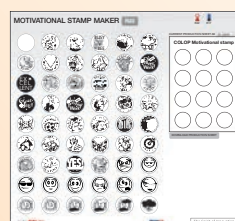

Motivational Stamp Maker
Create your EOS production template quickly and easily with the COLOP online tool „Motivational Stamp Maker". Many different designs are available. Each text can be modified to your language.

Flash Maschine

Optimally adjusted for the production of EOS stamps

The compact COLOP FS-800 and FS-1200T are simple to use. The machines are optimised for the whole EOS product range and the system guarantees excellent results every time.

The robust shutter mechanism distributes the pressure evenly on the flash text plate

Magnetic distance plates allow a fast switch over of the particular EOS systems

The flash process starts automatically by closing the lid
